<b>Short description of office</b>	<p>Universidad Politécnica de Madrid (UPM) is the oldest and largest technical university in Spain. It consists of twenty Schools plus two Faculties that cover most engineering disciplines as well as Architecture and Sports Science. UPM has more than 3,000 faculty members, around 38,000 undergraduate students, and around 8,000 graduate and doctoral students. About 5,000 students graduate every year. UPM is focused on higher education and research, UPM enjoys a high participation in EU-funded projects and had the highest participation among European universities in FP4, FP5 and FP6. UPM takes part in five EMMCs, being coordinator of one of them, and in two EMJDs. UPM also participates in eight EMA2 projects. UPM has developed interuniversity Doctoral Programs with numerous LAC institutions. Due to historical reasons and common language UPM plays a pivotal role in Latin America. Every year UPM funds around 40 cooperation projects with LAC institutions. UPM is a full member of the major LAC technological university associations (LACCEI, ASIBEI, HACU, Tordesillas Group, etc). UPM promoted the creation of a Network made up of European and Latin American and Caribbean Technological Institutions. This Network, called Magalhães, has smoothly been running for nine years. Most of the institutions taking part in ADDE SALEM project belong to Magalhães Network. Currently, around one thousand students move every year from one side to other of the Atlantic in the framework of this Network. Several double degrees (DD) have been the result of the collaboration and close friendship among Magalhães members.</p>
