SUMMER SCHOOL 2017

Univerza v Ljubljani

Resolutely on the chosen paths

Even in the summer months, when there are no scheduled lectures or exams, the University does not rest. Research and other activities which have to share the time with regular pedagogical activities during the year are at their peak. Among these activities are the summer school programmes organised by individual University Members for several years, or the occasional summer school programmes related to various research and other projects or programmes. The most traditional ones are the summer school programmes organised by the University of Ljubljana Faculty of Arts: the 53rd Seminar of Slovene Language, Literature and Culture, and the 36th Summer School of Slovene Language, attracting more Slovene language enthusiasts from all over the world each year. Other summer school programmes from a wide variety of areas hold interest as well: from economic and business sciences and law to chemistry, mathematics and physics, from social work to pharmacy and technical sciences. More than 30 summer school programmes will be organised in 2017, some of them for primary school students, others for undergraduate and graduate students, and some even for researchers and professors.

Choose one or more of our selected summer school programmes and spend your time in the smart way.

A handwritten signature in black ink, appearing to be 'G. Turk', written in a cursive style.

Prof. Dr. Goran Turk, Vice-Rector
